

North Florida Chapter

U.S. Green Building Council

We look forward to seeing you at this month's chapter meeting.

IMPORTANCE OF RESTORING VERTICAL GREEN IN THE URBAN CORE

PRESENTED BY: KEVIN SONGER

Jacksonville Office Manager for AVID Group

SPONSORSHIP OPPORTUNITIES AVAILABLE!

New to this chapter, we are now offering sponsorship opportunities. This is a great opportunity for you to highlight your company at our programs.

Contact the MAC Committee for more information

Kevin Songer

Please join us in welcoming Kevin Songer as he discusses how communities benefit from Vertical Green in the Urban Core. This presentation will communicate why we must refocus and educate on the importance of bringing significant amounts of Vertical Green plant communities into our Urban Core.

Reintroducing Vertical Green into the urban core is a critical component to the success of the evolving Sustainability Movement. All Floridians possess a stake in the success of the stormwater, flooding, habitat and sense of place components inherent to urban core Vertical Green. Through education, examples of sustainable projects and the physical greening of our schools, businesses and homes, Floridians can benefit from Vertical Green in the Urban Core.

Kevin Songer holds the Juris Doctor degree with a focus in Land Use and Environmental Law from Florida Coastal School of Law where he achieved the award for Academic Excellence in Environmental Law. Kevin is a LEED®AP, ISA certified Arborist and ISA certified Municipal Specialist, and manages AVID's Sustainability Department.
