As Green Building leaders, USGBCNF members must be in the forefront as retrofit dollars are released into our community. Emerging rebates and incentives from the Federal, State and local governments, as well as utilities, are offering billions of dollars to you and your neighbors for energy audits, financing and energy-efficient retrofits of existing homes. The time has never been better to take advantage of this for you, your neighbors and your business. This presentation by David Reed and Brian Pippin of JEA, and RGBC Chair Wally Conway, promises to put more money in your pocket, lower your power bill and establish you as the go-to Green expert in your neighborhood. Bring a co-worker, friend or neighbor so they too can enjoy saving money, energy and the environment.

Wally Conway is a graduate of the U.S. Naval Academy, retired Navy Pilot, licensed contractor, and ASHI-certified home inspector who is President of HomePro Inspections, right here in Jacksonville!

Wally has performed over 5,000 home and building inspections, as well numerous energy audits and infrared evaluations. He writes routinely and authored the book "Secrets of the Happy Home Inspector."

David Reed graduated from the University of North Florida with a Bachelor of Science degree in Electrical Engineering and a Masters of Business Administration. David has 16 years experience in the engineering and construction fields. He is an FGBC field agent, LEED-H field agent, a Florida Class 1 Energy Rater, a Certified Energy Manager, and is BPI certified.

Brian Pippin has a Bachelors degree in Industrial Engineering from Georgia Tech and a Masters degree in Business Administration from the University of Memphis. He is a registered certifying agent for the Florida Green Home Designation Standard as set forth by the Florida Green Building Coalition.
